DEMO WORK INSTRUCTION

SYNTHETIC TRAINING DATA

Document: DEMO-WI-001
Revision: A

STEP 001: Open the fictional training panel

Instruction: Open the fictional training panel described in this exercise. Keep the session in demonstration mode and do not connect to any operational system.

END STEP

STEP 002: Select the practice record

Instruction: Select the sample record named TRAINING-ALPHA from the fictional record list. Confirm that its visible label says synthetic training data.

END STEP

STEP 003: Check the demonstration label

Instruction: Read the demonstration label on the practice record. Compare the displayed document code with DEMO-WI-001 and leave all real records unchanged.

END STEP

STEP 004: Enter the sample session code

Instruction: Enter the sample session code PRACTICE-001 in the training-only text field. Review the characters before continuing to the next fictional step.

END STEP

DEMO WORK INSTRUCTION

SYNTHETIC TRAINING DATA

Document: DEMO-WI-001
Revision: A

STEP 005: Review the simulated step list

Instruction: Review the simulated step list in the training panel. Confirm that the list begins with step 001 and contains twelve fictional steps.

END STEP

STEP 006: Mark the practice item reviewed

Instruction: Set the practice-only review flag for the selected sample item. Add no real approval or production status to any external application.

END STEP

STEP 007: Add a training-only comment

Instruction: Add the comment Training example reviewed to the sample comment field. Keep personal details and real customer information out of the exercise.

END STEP

STEP 008: Save the temporary practice result

Instruction: Save the fictional practice result in the demonstration session. Confirm that the training panel displays the sample saved indicator.

END STEP

DEMO WORK INSTRUCTION

SYNTHETIC TRAINING DATA

Document: DEMO-WI-001
Revision: A

STEP 009: Reopen the saved practice result

Instruction: Reopen the saved sample result from the fictional session history. Verify that the practice session code and training-only comment are visible.

END STEP

STEP 010: Compare the displayed sample code

Instruction: Compare the displayed sample code with PRACTICE-001. If the characters differ in this exercise, record the difference in a training-only note.

END STEP

STEP 011: Record the training completion note

Instruction: Record the note Synthetic exercise complete in the sample result. This note documents only the fictional training session and is not a real work approval.

END STEP

STEP 012: Close the fictional training session

Instruction: Review the saved practice result one final time and close the fictional session. The exercise ends without sending information to a real operational system.

END STEP
